PROJECT

1. HELPING HANDS (Blood Group)

Environment : ASP.Net, C#, SqlServer.

Duration : 45 Days

Description: Helping Hands is a perfect solution for the Blood Donors and Blood Donees. In this application we have provided an option for registering the donors with there blood group and all the other details. So it has all the donors data repository. Whenever there is a blood emergency, they can login to the application and search for there required blood group. So that they can find the required donors information on the website. So that blood receivers can contact the donor and request for the blood that they need. Hence with this application we have provided a solution for the blood donees a platform to get their required blood group from the donors.
